

## **VirtualLUN 4.1.2 Release Notes**

**March 2009**

**This release is for the following systems:**

**VLUN 4G Fibre Channel Systems**

**SLUN 3G SAS Systems**

**GLUN 12 and 24 port 4G Fibre Channel Systems**

This is a maintenance release, and fixes a number of bugs and system issues.

### **Bug fixes:**

- 1103 Logout from initiator x would kill all io's to initiator y
- 1186 When using LUN masking, target reply errors can occur
- 1347 Check condition reported injecting read data overruns
- 1349 Web Service Hang issue
- 1357 The information field not set in sense data for blocks with check condition set

### **Enhancements:**

- New 4G Fibre Channel firmware provides improved operation with Cisco switches in NPIV mode
- Javascript enhancements made to address errors when accessing web interface.
