

Technical Product Manager

SANBlaze Technology, Inc., a leader in NVMe test platforms and Storage Emulation systems for the rapidly growing NVMe market, has an open position for a Technical Product Manager. SANBlaze is the leading test tool for Fabric (Network) and PCIe connected NVMe devices and is in a rapid growth phase as we develop test systems used by all major players in the NVMe world including Intel, SK_Hynix, Dell, Microsoft, Western Digital, Micron and many others.

To support our rapid growth and to accelerate the introduction of our next generation of storage test systems, SBExpress-RM5 and DT5, PCIe Gen5 test appliances, and our industry leading *Certified by SANBlaze* test suite, we are in immediate need for a seasoned and accomplished technical product manager. This is a brand new position at our company.

REQUIREMENTS

- A technical background with a B.S. degree in Engineering, Computer Science, Information technology, or a related field, or equivalent experience.
- 5-7 years' experience as a Technical Product Manager preferably in the storage industry.
- The ability to understand company strategy and economic drivers.
- Excellent communication skills. You will communicate with strictly business-minded people and with strictly technical-minded people -- and ensure that both sides have their needs fulfilled in an optimal way. You must be comfortable getting into deep technical discussions with engineers (and users) about the pros and cons of different approaches.
- A proven ability in solving customer's problems. Understanding and empathizing with customers is key to thrive in this position.
- Ability to communicate with the Leadership Team, Sales, Marketing, Software Engineering, Hardware Engineering, and Manufacturing and provide roadmaps and plan product releases in a timely manner.

In this role, the preferred candidate will:

- Be the face of customers by understanding and representing their needs and product requirements
- Analyze competitors' products and explore new ways to improve the company's products

- Work with the development team to ensure that product requirements are understood
- Translate product's strategy into detailed requirements for prototype construction and final product development
- Define the product vision, product roadmap, and product strategy
- Support the engineering team to ensure customer satisfaction goals are met
- Work within a software development methodology like Agile
- Coordinate product releases with marketing, sales, and engineering teams
- Ensure that user story content and prioritization is aligned to larger strategic objectives

REPORTING

The Technical Product Manager will report to the VP of Software Engineering / CEO of SANBlaze.

TRAVEL

Occasional travel may be required.

HOW to APPLY

Send your resume to Michelle Holmes at: mholmes@sanblaze.com.
